Dear valued Northam Platinum supplier,

Northam Platinum Limited has recently taken a decision to move to electronic trading. The ability to trade in this manner, with our suppliers, will be facilitated by M2North.

M2North provides a business solution that enables online transactions of any nature, between organizations, regardless of systems or platforms used, allowing each organization in the network to send and receive information in the format of its choice.

This means that no matter what systems or formats you are currently running, you'll be able to receive Northam orders, by email from M2North that are intelligible to you and match your particular rules and configurations.

By switching to electronic trading with Northam you'll find that:

- You never have to deal with illegible documents
- The inefficiencies associated with the use of fax, phone and other paper-based forms, are eliminated
- The speed of transacting is significantly increased
- 'Lost' transactions are eliminated
- Transactions can be resent by M2North

And there is end-to-end monitoring and support from helpful staff.

To enable the electronic process and for you to receive orders, it is a prerequisite that you register with M2North for a nominal monthly fee.

Consequently, you will be contacted shortly by M2North to load your details into the database and confirm your company's contact person for orders.
